About Indonesia & Bali

Indonesia is the largest archipelago in the world. Consisting of five main islands and 30 groups of smaller islands, it has a total 17,508 islands. It stretches between the continents of Asia and Australia and divides the Pacific and Indian Oceans at the Equator.

Indonesia is proud of its diversity of culture, which is derived from age-old traditions until the present day, and is the moving force in communal life.

A vibrant culture, unique arts ceremonies, friendly people and scenic beauty make Bali an almost unreal island in today's changing world and is therefore the main destination for pleasure tourists to Indonesia. Bali International Airport, Ngurah Rai, is nation's eastern gateway, served by numerous international airlines and charter flights. The attraction of Bali is its unique art and culture. It almost seems that every person is an artist in some form, whether it is painting, weaving, carving, basketry, etc. villagers spend their time in this art, which are taught from a very young age.

Message From the President of IFHRO

It is with great excitement and enthusiasm that I invite Health Information Managers around the world to participate in the 1st Conference of the International Federation of Health Records Organization in the South East Asia Region (IFHRO SEAR) to be held at The Patra Bali Resort and Villas in Bali, Indonesia 21st - 24th October 2008.

The aim of this conference is to bring together HIM Professionals in the SEAR countries to reinforce their commitment to their profession, to participate in educational activities and professional networking. This will be a wonderful opportunity to strengthen professional links and enhance collaboration in the region to the benefit of professionals both now and in the future and I hope that it will be the first of many such conferences.

The rapid progress in science and technology has allowed the use of information technology (IT) to bridge gaps in health information. The International Federation of Health Records Organizations (IFHRO) is strongly committed to the development and use of health records and health information in all countries and to the use of advanced information technology to support Health Information Management (HIM) around the world. This is of particular importance for the eleven countries in SEAR, consist of: Bangladesh, Bhutan, DPR of Korea, India, Indonesia, Maldives, Myanmar, Nepal, Sri Lanka, Thailand and Timor-Leste.

I firmly believe that working together in creative ways will help Health Information Managers to promote professional best practice and deliver the innovative research needed improve outcomes in Health Information Management and thus improve health status in the region.

I do hope that as many of you as possible will join us in Bali in October and be part of this very important event. I know that it will be an amazing experience that will enhance your professionalism and one that you will never forget. I look forward to seeing you there!

Lorraine Nicholson

Lorraine Nicholson
President of IFHRO

Message From the Director of IFHRO SEAR

On behalf of the Organizing Committee, I proudly announced that Indonesia will host the **The 1st Conference of International Federation of Health Records Organizations South East Asia Region (1st Conference of IFHRO SEAR)** that will be held in Bali at The Patra Bali Resort and Villas, on 21 - 24 October 2008. We are very pleased to invite you to the first IFHRO conference for SEAR countries. Participants from other IFHRO country members are most welcome too.

"Consolidation and Strengthening in Health Information Management among IFHRO SEAR Countries in the 21st century" is chosen as a theme for this conference as we have to promote the benefits and opportunities to be achieved through participation and collaboration with colleagues in developing and advancing practice in establishing basic health records practices and related standards, exchanging information on health records education and training program, creating communication opportunities between persons working in the field of health records, and guiding the establishment and development on national HIM associations.

The availability of accurate and timely data is very important to support appropriate policy making, planning and implementation of health intervention. Thus, the use of advanced information technology is needed to support HIM. The World Summit of Information Society (WSIS) declaration (2004) has acknowledged this issue and stated that by 2015 all hospitals and health institution globally should have already been linked with information technology.

The conference will take place in Bali, one of the fabulous leisure destinations in the world where business and leisure could combine harmoniously.

We are very enthusiast and optimistic that the coming IFHRO SEAR conference will be able to give inestimable value to all participants as well as unique experience where Bali is famous for. I warmly welcome you to Bali.

Sincerely,

Gemala R Hatta

Gemala R Hatta
Director of IFHRO SEAR
